ping-pong / snowboarding

/ coffee / yoga / reading

/ biking / always learn-

ing / always growing

## Projects:

### Nomad Barber

mobile app

This mobile app opens a line of communication between users and "Nomad barbers" in their area who will come to their location for a haircut or beard trim. This app features two factor SMS authentication.

*Built with:* React Native, Node.JS, Mongoose, MongoDB, Express, Javascript, Twilio, HTML5, mLab, Git/Github, Heroku

### What Ales You

web app

This group project is a web app where users can view breweries in their area and the beers they have on tap. Users can save the beers they have rated to their profile.

*Built with:* BreweryDB API, Google Maps API, Facebook API, location services, passport, Node.JS, knex.js, Express, jQuery, Javascript, Materialize, HTML5, CSS3, Git/Github, Heroku

## Headlines

website

This website displays the latest headlines from multiple news sources. It uses the Watson API to analyze the articles and the Giphy API to display a gif conveying the emotion of the article.

*Built with:* Watson API, News API, Giphy API, jQuery, Javascript, Materialize, HTML5, CSS3, Git/Github, Firebase

## Education:

### Galvanize

Web Development Immersive, Denver, CO

Nov 2016 - April 2017

Intensive full stack development program. Trained on front end and back end technologies to build applications individually and in group formats, with an emphasis on Agile workflow.

### UCCS

Mechanical Engineering, Colorado Springs, CO

Nov 2011 - Dec 2012

Attended three semesters at the University of Colorado in Colorado Springs. Completed courses on calculus, physics, and chemistry.

## Experience:

### Eye Candy Graphics

Production Manager, Denver, CO

Jan 2013 - Oct 2016

Managed the production and installations of custom signage and art. Coordinated with clients for scheduling and planning.
